

SpeedFusion Connect Relay

Remotely.....

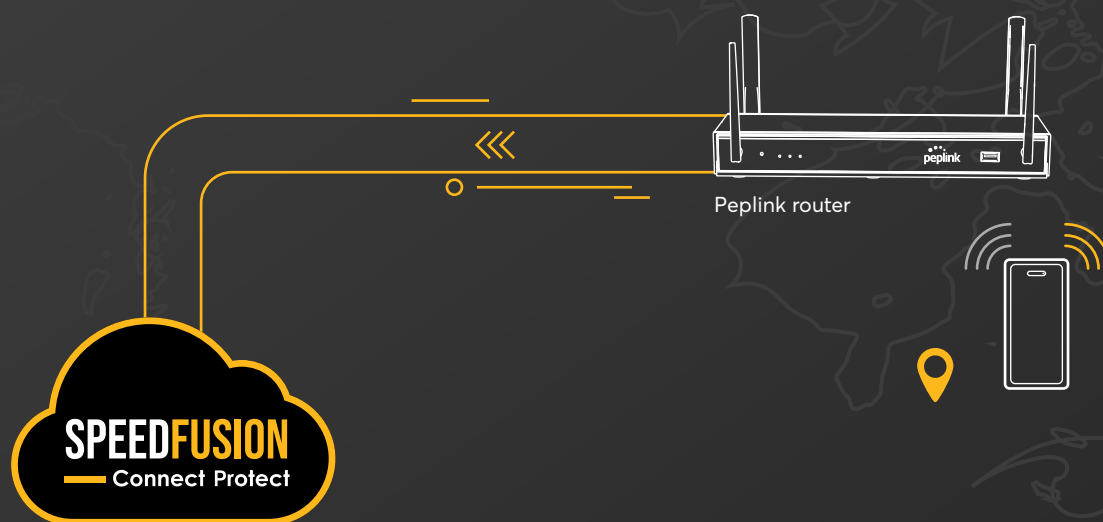

Connect.....

to your home network.....

like you never left the house.....

SpeedFusion Connect Relay

**Supercharge your home router
into an extra endpoint for your
SpeedFusion Network**

Any home router

**Internet access
like you never left**

The SFC Relay allows you to access the Internet through your router even if you're physically away from it.

SpeedFusion Connect Relay

Access devices in your network through a private tunnel

With **InTouch**, users can access all services and applications hosted on devices within a network from outside the network.

Flexible remote support

For service providers, plug in the SFC Relay to your customers' device and have **tech support** access their router without leaving the office.

Plug and Play

Installation is **straightforward and simple**. Plug in the SFC Relay to your router and voilà, a new addition to your **SpeedFusion network**.
