

A UNIQUE USER EXPERIENCE
HID Mobile Access® opens doors in a whole new way. With our innovative, patented gesture technology, just twist the mobile device upon approaching a door or parking gate for seamless access.

SECURE ACCESS CONTROL THROUGH MOBILE DEVICES

- **Innovative** - Leverages standard communications technologies for a mobile solution that is interoperable with iOS® and Android™-based smartphones.
- **Convenient** - Activate with a tap or “Twist and Go” gesture to open doors easily, merging security with convenience.
- **Dynamic** - Increase operational efficiency by managing mobile access through a robust, streamlined portal.

HID Global® has a long history of successfully moving physical access control forward. The evolution of mobile access is no exception. HID Mobile Access® leverages standard mobile device technologies to create a solution that is universally accessible, easy to deploy, and simple to manage.

Rarely misplaced and consistently in hand, the mobile device has become the most valued technology we own. HID Mobile Access merges security with convenience by storing secure identities on smartphones for opening doors and gates. This powerful solution enables Android or iOS phones to communicate with readers using a close-range “Tap” mode, or from a distance with HID Global’s patented “Twist and Go” mode. Active feedback including vibration and sound enhances the user experience when opening doors.

HID Mobile Access makes managing access control easy. Increase operational

efficiency with the ability to manage Mobile IDs through a robust online portal. Simply send invitations and provision or revoke Mobile IDs over-the-air. No physical encoding, printing or returns are necessary – secure identities are managed wirelessly through the phone.

Powered by our award-winning Seos® technology, HID Mobile Access provides superior identity management and delivers the most dynamic mobile solution available today.

HID MOBILE ACCESS® FEATURES:

- Consistent user experience across different devices and operating systems including iOS and Android.
- Phone and reader interaction is intuitive, easy to use and enables new ways to open doors.
