DESCRIPTION

BEA's **900 MHZ FAMILY** compact transmitters and receiver allow wireless activation of any door control. FCC Part 15 certification ensures proper compliance with federal radio frequency regulations.

900 MHz wireless technology provides greater line-of-sight transmission distance than legacy wireless frequencies. It also provides better penetration of obstacles such as walls, partitions, doors or low-emissivity glass.

BEA's **900 MHZ FAMILY** series of wireless devices includes the touchless retrofit transmitter for easy upgrade of touch push plates to touchless solutions, which typically require additional wires to be run for installation.

The **900 MHZ FAMILY** industrial series offers a line of IP65 rated hand-held transmitters, ideal for industrial environments. This family also has a convenient beltclip accessory.

Signal Strength Indicator

Multi-color LEDs on receiver provide installer with visual notification of signal strength and activation status

Consistent Transmission

Frequency hopping allows consistent transmission in areas with other 900 MHz devices

Enhances Accessibility

Offers a means of activation for those with limited mobility or disabilities

Variety Of Accessories

1, 2, 3, and 4 button handheld transmitters provide flexibility where multiple receivers are used

Extended Hold Functionality

Extended hold and toggle/pulse functionality is integrated for various application needs

Learn Modes

Delay and no-delay learn modes provide either instant or delayed activation for the sequencing of doors

APPLICATIONS

Wireless Actuators

Limited Mobility
